

EmotiGo / E-Go

Design Project by Tomi Nieminen

Designerly Approaches to Social Media, 2021

Hate?

Prejudice?

Uncertainty?

Distrust?

Loneliness?

Conspiracy?

Social
anxiety?

Fear?

Suspicion?

Isolation?

A photograph of a crowded nightclub or bar with red lighting. Several people are visible, some with thought bubbles overlaid on the image. The thought bubbles contain text about social anxiety and dating. In the background, there are signs for "COCKTAILS" and "SALE".

I wonder if
she likes
me...

I wish I met
someone new
tonight

I just want to
share my
good feelings

Oh man, he's
way too
pushy

Am I weird?
Do they like
me?

I need a
woman tonight

I wish he'd
approach
me...

I wish she'd be
interested in
me...

Excellent
service...

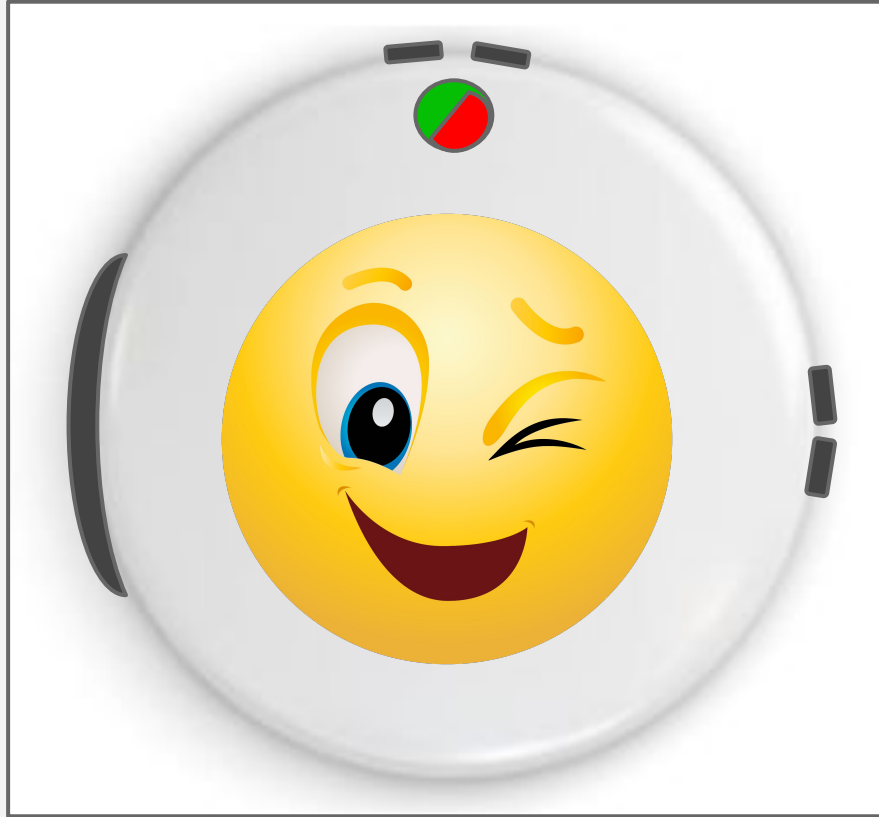

Wonder if he
really got what
he wanted?

**The point here is that
everyone just assumes what others think
but don't really know.**

And for some reason it's often difficult to ask.

**Here's a tool to ease out this gap and
lower the threshold for open communication.**

EmotiGo

Features

SOUND COMMAND & BUTTONS:

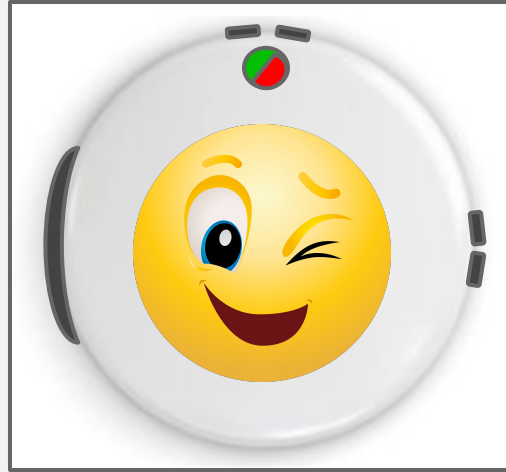

“Open” for green light : communicates openness for encounter

“Close” for red light: communicates a wish to stay alone

RIGHT SIDE WHEEL

Express with Emojis (chosen with desktop UI)

Custom texts: “Come along”, “Join us”, “Lonely”, “Hug me”, etc.

LEFT SIDE BUTTONS

Switch the background color to express emotions, match clothing, or something else

TWIST THE BADGE to switch message:

Love - Like - Interested - Neutral - ? - Not interested - Go away

Desktop UI with USB connection

Add profile:

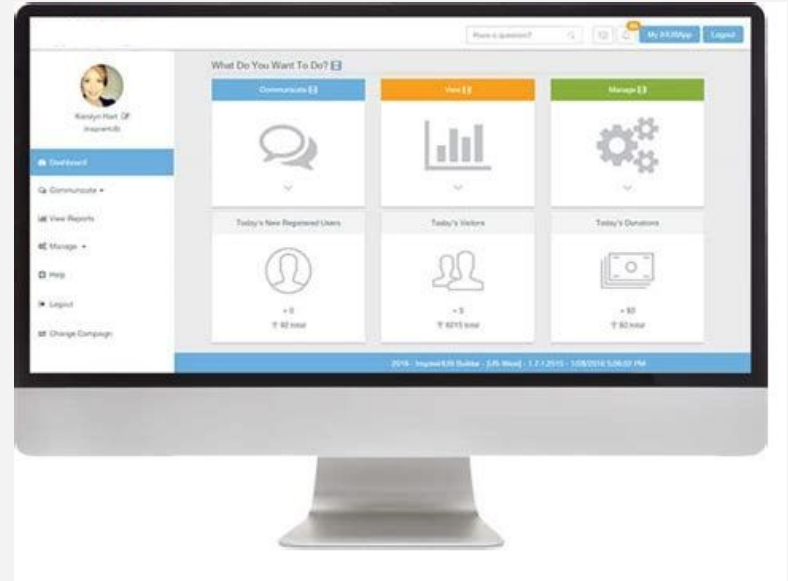

- name
- phone number

Show data

- reactions you've got
- reactions you've sent
- messages

Choose emojis and write texts for the right-side menu wheel

- For customized communication
- For example conversation starters

Have fun with it!

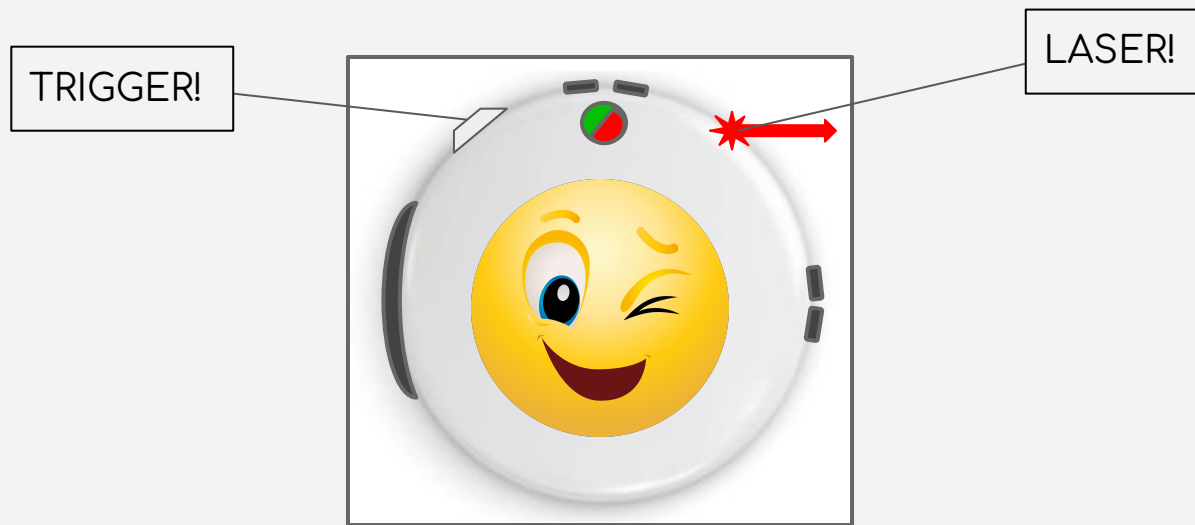

You can send messages to other badges, such as like, probe, no, yes, your contact info etc.

Have fun with it!

You can send messages to other badges, such as like, probe, no, yes, your contact info etc.

BUT ONLY IF YOU HIT THE TARGET BADGE
WITH AN IN-BUILT LASER !!!

Have fun with it!

When hit, the badge makes a sound and flashes a light.

Good to know

Yes, the laser is totally safe.

No internet connection -> no data analytics- > no social scoring.

Also available for left-handed.

RULES:

1. Switch on/off anytime you like and no explanations needed
2. Be honest
3. Respect others' use of the EmotiGo-badge

Thank You!
